CALL MANAGEMENT

Optimize the reception of your listeners with advanced call management. ip-screener offers precise qualification with multi-criteria, customizable pre-selection files.

Our solution ensures multi-antenna and multi-studio transfer.
It provides a permanent display of waiting time, as well as a quick overview of caller potential.

CONTEST MANAGEMENT

The ip-screener solution enables meticulous planning of endowments per antenna, with real-time inventory of stocks.

Efficient management of games and competitions is ensured by rigorous tracking of winners. Prize limitation guarantees fair and optimized distribution.

All these features provide a smooth, reliable experience for listeners and professionals alike.

INSERT CONTROL

Multi-codec management and standard or on-air instant messaging ensure optimal internal communication.

Moderated access to social networks promotes secure interaction.

With advanced Producer, Director and next-generation On Air Side features, we effectively reduce call waiting time and maximize airtime with superior broadcast quality.

SOCIAL MEDIA

The ip-screener solution facilitates smooth, efficient moderation and management of flows.

Thanks to in-studio message viewing, teams can react in real time. The in-house newsletter guarantees constant updating and seamless distribution.

These features ensure an optimal listening experience for your listeners, while facilitating the work of production teams.
